

Battles of the Seven Years War, volume 2

Errata, August 1, 2010

The following errors have been identified in this book. Additions and corrections are noted in red.

W1 HASTENBECK

Terrain: Omit the reference to the Wessel River; it is off-map to the west..

The Streams: All streams are marshy-banked **where marked**.

Victory: To win, the French must capture the **road exit point to the** town of Afferde, thus cutting the Allied line of communication and forcing a withdrawal north toward Hanover. Failing this, the Allies win.

W2 KREFELD

Terrain: **There should be a bridge crossing The Great Ditch at Votzhoeffe.**

Smaller Table: **If the smaller table is used, allied troops may enter on the finger of land between the Laqndwehr and the Great Ditch**

W3 BERGEN

Victory: To win, the allies must capture **two** out of **three** key objectives, those being the town of Bergen and the **two** hills. Failing this, the French win.

Deployment: The French deploy anywhere on the west half of the table, but including all of the town of Vilbal **and all of the open ground up to and including the eastern-most sunken road.**

W5 WARBURG

The Diemel: The Diemel River is treated as a marshy banked stream. **The Diemel enters in the middle of the west edge, flows southeast, then east past Warburg and then off the south edge.**

Streams: The streams shown on the map have **marshy** banks.

W6 KLOSTER KAMP

Smaller Table: If a smaller gaming area is available cut up to two feet off the northwest edge and up to two feet off the northeast edge. **The victory locations for both players then become capture of the north battlefield corner (by the Allies) or the east battlefield corner (by the French).**

E1 GROSS JAEGERSDORF

Terrain:

The Pregel: The Pregel River is un-crossable except at the bridge..

Deployment: The Russians set up their troops first. All troops set up on the **eastern** half of the battlefield.

E2 ZORNDORF

The Streams: All streams on the map have marshy banks **where marked**.

THE MAPS

The town and terrain feature labels on the maps of the first printing were garbled by the printing process. The correct versions of all nine

maps are included below. Only a few of this version of the book were sold. If you have a defective version contact us for a replacement.
